

INFORMATION SYSTEMS SECURITY GROUP

SUMMARY REPORT - January 1976

HIGHLIGHTS

1. Final installation of the Alarm System protecting the Data Distribution Grid in the Headquarters Building has been completed. Arrangements are being made with Technical Security Division to coordinate efforts necessary for full implementation of the System.

2. A representative of the Department of State was given a detailed briefing by the Agency's Top Secret Control Officer on the Agency's automated system for controlling collateral Top Secret documents (TSCADS).

3. The security requirements for the Support to the Analyst File Environment (SAFE) System were forwarded to the SAFE Project Director on 15 January.

4. As a result of the 16 January meeting of the Computer Security Subcommittee, Security Committee, United States Intelligence Board, a draft of a re-write of DCID 1/16 concerning security of ADP operations has been distributed in the Agency for coordination.

5. Members of the Office participated in several meetings with the Office of Research and Development concerning research requirements of the Office of Security and, in particular, computer security.

6. The annual inventory of all COSMIC Top Secret documents issued to this Agency has been completed, and a certification has been forwarded to the Central U.S. NATO Registry.

7. A member of Information Systems Security Group participated in the presentation by the Deputy Director of Security (P&M) to the SAC Conference.

STATINTL

8. The coordination of [REDACTED] Policy and Responsibilities continues. A response to comments received during Agency coordination has been forwarded to Regulations Control Branch, ISAS.

9. Inputting of data into the TSCADS (Top Secret Control Automated Data System) continues. ISSG has now begun inputting DDI/CRS holdings, as well as DDS&T/OWI.

10. The Data Distribution Grid in the [REDACTED] has been monitored throughout installation by members of Information Systems Security Group and the Office of Communications. Phase I (Office of Logistics) space has been completed.
